INTRODUCTION

If you are a coffee drinker, and are looking to perfect the coffee you drink, this book is for you. If you are, or want to be a connoisseur of the true rich flavor that coffee offers in its finest form, this book is also for you. And, if you love making and tasting a fabulous dessert accented by the taste of fine coffee then, you guessed it, this book is definitely for you.

This book was created out of my personal love for the taste of fine specialty coffee. It’s the first thing I grab in the morning before heading out the door to work. It’s what I enjoy at a café or restaurant for Sunday afternoon brunch. And nothing beats a good cup of espresso or cappuccino to finish off a great dinner.

Over the years, I have discovered many ways people around the world enjoy the taste of coffee. From strong and black, to mild with cream and sugar or honey, to gourmet recipes ranging from coffee cake to cappuccino truffles, there is a wonderful world of treats.

I’ve collected, and tried hundreds of recipes over the years, and so far, it’s been a wonderful experience. So wonderful in fact, that I wanted to share it with the world.
I’ve taken what I believe to be the best of the recipes I’ve collected, and comprised them in this book. It is, I have found, one of the bigger collections of recipes comprised only of coffee based recipes. I hope you enjoy these recipes as much as I have.

Specialty Coffee, the Key Ingredient

Every gourmet recipe, from Tiramisu to classic coffee cake deserves only the finest ingredients, and specialty coffee made from 100% Arabica beans is the choice for your greatest creations. So what is specialty coffee? According to experts, it is coffee made from the highest quality beans found in the world. The beans are then perfectly roasted by artists known as master roasters to bring out the full flavor of the bean. The different between specialty coffee and any commercial brand is the difference between roses and dandelions.

There are 2 main types of coffee generally available to consumers. The first is made with Arabica Beans (ROSES!). These are the finest available. Specialty coffee is made exclusively with Arabica Beans. Varieties such as Kona coffee from Hawaii, Columbian Supremo, and Jamaican Blue Mountain are highly cherished and are considered some of the best coffees in the world. All my recipes are made only with 100% Arabica coffee. Using anything else is like topping a souffle’ with tomato catsup.
Specialty coffees made with Arabica beans are a little more expensive than supermarket and convenience store beans, and the reason is simply this. Arabica beans are a much higher quality coffee bean, producing a coffee taste that is incomparable. The love and care given in the preparation and roasting of these beans always provides for a consistently superior coffee flavor. If you are going to treat yourself to a 4 star quality recipe, shouldn’t you begin with a 4 star quality coffee?

JAMAICAN BLUE MOUNTAIN

The second type of coffee most widely available throughout most of the world is known as Robusto (dandelions). This variety of coffee is considered inferior by most coffee experts, including those qualified to judge and rate coffee in an international scale. Costa Rica, which produces some very fine Arabica coffee beans, has even passed a national law against the cultivation and harvesting of Robusto coffee plants. Some of the biggest customers of Robusto coffee beans are big commercial coffee companies that market canned and prepackaged coffee to supermarkets, convenience stores, and commercial wholesalers. It is not fresh roasted, and the difference in taste and quality is obvious. It is proof that when it comes to coffee, you truly get what you pay for.

Conclusion

These are just a few of the many recipes I have had the pleasure to collect and try over the years. There are so many more gourmet coffee drink and dessert recipes, many yet undiscovered. All that is required is a love of great tasting specialty coffee, and a creative imagination.

My hope is to continue to discover, and experiment, and enjoy.

The most important thing to remember is that there are generally 2 types of coffee generally available. The first type is specialty coffee. It is 100% Arabica bean coffee that is hand selected by the coffee companies that have a genuine love and appreciation for fine coffee.

Specialty coffees are roasted by master roasters (usually to order), who have years of experience and knowledge in bringing out the best flavor that each individual bean can produce. They are truly artists with a talent for coffee roasting and preparation. Specialty coffee is the only coffee I buy, drink or use to create any recipe with.

The second type of coffee is Robusto. You will find it in most supermarkets and convenience stores. This is mass produced by big commercial companies who care more about profit, than the love, care and time needed to roast great tasting coffee. If you have tasted 100% Arabica bean specialty coffee, you will taste a noticeable difference.

There is one more thing to look for. In very few cases will you find what type of coffee beans are used in commercial coffee. Recently there have been exceptions when a few packages in the supermarkets are labeled “100% Arabica Beans” but this is more the exception then
the rule. Only your specialty coffee vendors will have the knowledge of exactly what type of beans and the country of origin in the coffees they sell. I have even asked employees of numerous restaurants and super markets where their coffees come from, and almost none of the people I have asked know the answer. All they can tell me is that “it’s a blend”. But, don’t take my word for it. Walk into store other then a specialty coffee shop ask someone. Then decide for yourself.
