How To Prepare Simple, Healthy Meals For Great  
Results In Fitness

# Chapter 1:

## *Healthy Meal Basics*

---

### Synopsis

Ideally small amount of food intake is best but only if these amounts consists of nutritionally balanced and healthy elements.

Exploring the various nutritional basics of each category within the food groups helps the individual to make informed choices regarding the food consumed. Upon gaining this understanding the next step would be to make the changes needed but doing so gradually would better reap positive results as opposed to drastically making the change which the body may accept for a short period of time and then reject in the long run.

## **The Basics**

Finding the foods in simpler and more variety and freshness though still maintaining some of the favorite ingredients helps the body accept the new food intake with less of a shock to the system both body and mind.

Making these changes over a period of time is also necessary if the effort is to remain continuous. Substituting certain unhealthy ingredients with healthier one while still maintain the general recipe is also recommended.

Totally avoiding unhealthy foods is of course ideal but really quite an unrealistic pressure as it causes the individual to feel deprived and stressed, therefore a better alternative would be to wean themselves slowly off the item instead.

Learning to eat in smaller portions also helps the individual start the journey towards healthy eating. For some cutting out certain foods may be such a difficult effort that the next best solution would be to try and cut down the portions. Also developing the habit of avoiding heavier meals towards the end of a day is also wise.

# Chapter 2:

## *How Black Beans Help And A Black Bean Recipe*

---

### Synopsis

As more and more people become aware of this particular food called the black bean the interest in it has also become heightened. Originating from Mexico and very much a part of the South American diet, these black beans have been proven to be quite a nutritionally pack food group indeed. Today it is popularly found in most restaurants and homes in various forms such as salads, staples and other delicious dishes.

## **Black Beans**

The black beans consists of high protein and fiber contents and is considered very nourishing as both these essential elements are present within one food item. Fiber and proteins are considered very important to the wholesome function of a healthy body. Besides this it also has flavonoid anti oxidants content which assist the body avoid oxygen related damage. Black beans also consists of omega 3 fatty acids and has a high nutritional value.

Black beans are also very easy to incorporate into most meals as it has a basic flavor of rich smokiness, which gives added character to any dish. The velvet texture, shape and color hold well during cooking and makes for a very interesting looking ingredient indeed.

### **Black Bean Salad**

#### **Ingredients**

The Salad - (I try to keep the cuts not too much bigger than the beans & corn - for appearance & to get a little of everything in a spoonful)

2 lbs. black beans (I have a pressure cooker, but go ahead, use 2 15 oz. cans, well-rinsed.)

2 lbs. cooked sweet corn, cut from the cob (OK, you can use 2 - 15 oz. cans of whole kernel corn or 2 lbs. of frozen corn, drained)

8 green onions, diced

2 cloves garlic, large, minced

2-3 jalapeno peppers, cleaned, diced (more if you like)

1 green Bell pepper, cleaned, diced (I also sometimes add a small sweet red pepper, for both sweetness & color)

1 ripe avocado, large, pitted, peeled and diced

1 jar (4 oz) pimentos, drained

3 tomatoes, seeded & diced

1C fresh cilantro, chopped

Sea salt & fresh cracked black pepper to taste

The Dressing

3 T fresh lime juice

2 T fresh orange juice

2-1/2 tsp lime zest

1/2 tsp ground cumin

Sea salt & fresh cracked black pepper to taste

Directions

Combine all the salad ingredients in a large bowl. Season with the salt & pepper. Whisk the dressing vigorously to incorporate. Add the dressing to the salad and gently toss to combine everything. Chill until ready to serve. Lightly toss again prior to serving.

Prepare this salad at least 4 hours prior to serving to let everything - except the avocado - marry joyfully in the bowl.

You do want to let the avocado bathe in the lime juice of the dressing - better presentation that way, and you can store the avocado pieces in a small container. Then, pour the dressing off the avocado and mix the salad with the dressing, then dress the top of the salad with the avocado pieces at service.

Very pretty dish & the absence of any oil seems to make all the veggies sparkle in a light citrus glow. You want this salad well chilled, but if you don't bathe the avocados in the dressing first, they will end up looking like grey lumps of pork as the air hits them.

# **Chapter 3:**

## ***How Oats Help And A Oat Recipe***

---

### **Synopsis**

Eating oats to enhance good health is not something new but has been practice through time. Oats is a very simple ingredient with far reaching positive effects and benefits.

Oats within a diet plan provides a wide range of important health benefits which cannot be duplicated by any other food item singularly. Being a significant dietary fiber source, oats consists of soluble and half soluble fibers which help to keep blood cholesterol levels effectively under control.

Some of the areas where oats has been known to be beneficial are in improving heart conditions, regulating blood sugar levels, functioning as anti cancer fighters, keeping blood pressure under control, maintaining regular and healthy bowel functions, helping in weight control, boosting athletic performances, and in general health and longevity.

## Oats

Oats is also a food item that is rather hardy and can be grown in poor soil conditions which is of course another plus in terms of its availability. The various processes that the oat has to be subjected to before it reaches the dining table does not cause its nutritional value to decrease rather it is able to maintain its concentrated high fiber and nutrient base.

Oats can be a great day starter in the form of a piping bowl of oatmeal which can be more flavorful with the addition of fresh fruits, nuts or the dried fruits variety. It can also be used to make oat meal cookies which are usually a huge hit with kids and adults alike. Breads and muffins can also have the addition of healthy oats to it as with poultry stuffing too.

### Golden Honey Oat Bread Recipe

#### Ingredients

1 1/4 cups and 2 tablespoons water, room temperature (70 to 90°F.)

1/2 cup rolled oats or barley flakes

1/4 cup flax seed cracked

2 cups unbleached flour

3/4 cup whole wheat flour

2 tablespoons vital wheat gluten

1 tablespoon powdered milk

2 tablespoons honey  
1 1/8 teaspoon instant yeast  
2 1/2 tablespoons canola oil  
2 teaspoons salt

## Directions

Equipment: A 9 by 5 inch/ 7 cup bread pan, coated lightly with cooking spray. A baking stone set toward the bottom rung and a cast-iron pan on the floor of the oven.

### Step 1: Make the dough (Bread Machine)

In the bread machine container, combine water, oats, and cracked flax and mix to moisten. Then let sit covered for a minimum of 15 minutes.

In a medium bowl, whisk together the flours, gluten, powdered milk, and yeast.

Add the honey, and oil to the oat mixture and then the flour mixture. Mix 3 minutes and allow to rest for 20. If your bread machine always restarts with a 3 minute mix allow it to do so while adding the salt and then go into the kneading cycle for 4 minutes. If it starts with the kneading cycle also run it for 4 minutes, adding the salt at the beginning of the kneading cycle.

### Step 2: Let the dough rise

Using an oiled spatula or dough scraper, scrape the dough into a 2 quart container with cover or bowl, greased lightly with cooking spray or oil. Push down the dough and lightly spray or oil the top of the dough. It will be 4 cups /943 grams/33 ounces.). Cover the container with a lid or plastic wrap. With a piece of tape, mark where double the height would be. Allow the dough to rise (ideally at 80 to 82°F/28°C) until doubled, about 1 hour, 15 min. For extra strength and elasticity, you can stretch it after the first 30 minutes. To achieve a moist and warm temperature I put a small container of very hot water—about 1 cup--under a plastic box to create a proofer and change the water every 20 to 30 minutes. (You can retard the dough overnight after the first rise by gently deflating it and refrigerating it but it seems to rise best when baked the same day. If you refrigerate it overnight, remove it to room temperature. For about an hour before shaping.

### Step 3: Shape the dough and let it rise

Turn the dough onto a lightly floured counter and press it down to flatten it slightly. It will still be sticky but use only as much flour as absolutely necessary. Shape it into a log and allow it to relax covered for 20 minutes. (This is essential for an evenly shaped dough.)

Shape the dough into a loaf set it into the prepared baking pan. It will be about 3/4 inches from the top of the pan.

Cover the shaped dough with the plastic box or oiled plastic wrap and allow it to rise until almost doubled and when pressed gently with a finger the depression very slowly fills in. The highest point will be

about 1 1/2 inches higher than the sides of the pan. Using the plastic box and hot water it takes 1 hour 15 minutes to 1 1/2 hours. At a cooler temperature it will take longer. Meantime preheat the oven for a minimum of 40 minutes.

#### Step 4: Slash and bake the bread

If you like the look of a bread with a slash down the middle, with a sharp knife or straight edged razor blade, make a 1/2 inch deep slash down the top of the dough. You can also leave it unslashed. Mist the dough with water, quickly but gently set the baking sheet on the hot stone or hot baking sheet and toss 1/2 cup of ice cubes into the pan beneath. Immediately shut the door, lower the temperature to 375°F/190°C, and bake 20 minutes. Turn the dough around, tent, and continue baking 15 to 20 minutes or until the bread is golden brown and a skewer inserted in the middle comes out clean. (An instant read thermometer inserted into the center will read about 205°F.)

#### Step 5: Cool the bread

Unmold the bread onto a wire rack and allow it to cool, top-side-up until barely warm.

# Chapter 4:

## *How Avocados Help And A Avocado Recipe*

---

### Synopsis

More and more today the world is looking to avocados as the next wholesome nutritious food replacement. Originating in Mexico and Central America it can now be found in many other countries like Indonesia, Philippines, Thailand, India, china, Japan, Peru and the list goes on.

## **Avocado**

Ranging from being able to cure certain cancer diseases to the ideal food energy source for body builders, this remarkable fruit is fast gaining the popularity it so aptly deserves.

A little known fact about the avocado is that, when the avocado fruit is mixed into salads, it aids in the absorption of all the other nutrients the salad may have in a more efficient way.

When a comparison is made with other fruits the avocado wins all the time, as the fruit that is better able to allow the nutrients to be absorbed and also for its high content of many different nutrients.

The avocado is also considered a “meaty” fruit as the creamy like texture is rich and quite adequately makes for a good meal or an accompanying ingredient that enhances and enriches any dish.

For those wanting to avoid certain foods for health or religious reasons the avocado is known to be a good substitute as it contains adequate amounts of meat proteins, fat oils, vitamins and minerals.

## Avocado Dip

### Ingredients

4 avocados

1 red onion

1/2 bunch of cilantro

1 ear of sweet corn

1 pint of sweet grape tomatoes

Juice of 1/2 lime

2 fresh jalapeno peppers

### Directions

Remove avocado and dice in a bowl. Shuck corn and remove kernels from cob and add to avocado. Dice red onion, cilantro and jalapeno. Slice tomatoes in half. Add to mixture, season with salt and pepper. Cover with plastic wrap and store in fridge. Be sure to press plastic wrap to the surface of the dip to prevent browning. I also add the avocado seed to the bowl to help prevent browning.
