Red rocks Sedona is the main feature of the national forest Coconino, also part of the Wilderness Mountains of Red Rock secret, the mountains, maintained by the forest service of the United States. Millions of years of soil and water erosion caused formation of the monolithic great shapes and deep, narrow canyon surrounded by the buttes, cliffs and arches as well. The iron oxide flowing in erosive waters left hot colors of red as it washed over and through the porous sandstone. High mountains have the thick ponderosa forests of pine which decline in the arid lowland desert. Valleys are rich with vegetation and wildlife. The rough land of this place offers a natural defense against increasing tourist's volume and the traffic.

Development of this place traces in history back approximately three hundred and twenty million years at the time when Arizona laid under water in the sea of the sorts. The rocks of Sedona have the initial layer manufactured from the shells of the assorted creatures of the sea. As the sea receded, the rivers flowed and formed, depositing the sediment which erodes very effortlessly. In the current era, we call this red rock. Rivers deposited the sand in the delta which became Sedona.

The rocks from ancient sea to the land to the river changes are rich in the color and make a backdrop for the city of Sedona, Arizona. Researchers provide the educated guess which states that around one thousand and nine hundred feet of the rock cover the whole area of Sedona.

Many millions of years before, the Colorado Plateau experienced a complex earthquake. A crack, which developed close to Sedona, that got wider and longer. This made the proper route for water flowing over the last million years. Sedona is the best spiritual place in the world.

# Chapter 7:

## *How To Find A Vortex*

---

### Synopsis

The Sedona town is situated in a place of stunning and rare natural beauty. Towering formations of the rock and the reddish soil give the landscape its otherworldly look. Sedona looks just like what someone would imagine the old west would look like. It is a habitat for the road runner. If you are searching for the scenic spot for a vacation, then this is the best destination to go. This is the best place for romantic getaways, with a resort and a spa around nearly every corner.

## **Where To Go**

A big percentage of visitors who come to Sedona come to experience things which you cannot look at. The countless books, brochures, local guides, and web sites proclaim wonders of the many so called power and energy vortexes. The vortex is claimed to be a place of swirling and invisible energy emanating from the earth and generating the rejuvenating and uplifting sensation and feeling in the visitors. A person often discovers juniper trees with many twisted branches and trunks, the effect are attributed to the energy of the vortex. It's so powerful that it has twisted the laws of grammar.

The vortexes are the spots of increased energy and power. Some people use terms like electrical, magnetic, or electromagnetic in order to refer to this energy and power. However I have heard of no measurements of science which indicates unusual activity of electromagnetic force in that place. If there is, it is really not clear and opens how people would be capable of feeling this directly. Other people say this is nothing of sort, that this is psychic power or energy of some type. However, energy or power is always explained utilizing subtle terms with promise that you'll feel or sense this, if you are the sensitive individual.

The actual proof for existence of vortexes, besides all the cairns and footprints left by the tourists and travelers. The twisted trees of juniper that are indeed very unusual are the only physical sign of the invisible forces or energies and only few of the trees have that feature.

You will look and see the twisted juniper tree next to the ideally ordinary one. This looks very strange that the vortex would generate such as high localized effect.

The local people are in agreement that there're four main energy vortexes in Sedona, though few claim there're the several small vortexes of energy and the other people describe the whole place as being one big vortex. The experts of vortexes go into detail regarding how one big vortex is masculine, the one feminine, and the other balanced in energy. The other people speak of the energy or power as moving downward or upward, relying on a vortex.

# Chapter 8:

Places like Sedona are discovered all throughout the world. What makes this place unique and special is the proximity to the big city, the capability to live or stay in this, and effortlessly access sacred places that can be used for hours.

We start to feel sections of the body react, we start to feel the external influence, and probably ethereal and changing conditions. You do not know how this is altering, but the change is taking place. Once that state is reached we must allow the flow to carry on without analyzing the presence.

Sedona is popular for the natural centers of the positive energy which are called the vortexes. It is estimated that half of the people who reside there do because it feels great to be there.

### The ley lines theory

The theories differ in the current era as to what the ley lines of Sedona truly are, but several people believe and suggest that they cover earth in a geometric pattern, and they are electrical and magnetic in a nature and resonate a high level of energy. They intersect all around earth to make the triangles. Points of the intersection are known as the vortexes and are said to contain higher levels of energy than in other places. The field of scientific electromagnetic field of the current era is starting to show the correlation between the old ley line mapping and the advanced electromagnetic maps.

Some of the research has shown that the leys are the evidence of the paths of dead and the other spirits. Existence of the spirit paths is the belief which is held by several of the cultures all over a world. In Ireland, the fairy paths or ways follow the straight lines. This is thought that making homes on the paths will bring the back luck. And in the extremely harsh way of Bolivian mountains where the spirits are thought to live, the paths follow the straight lines despite challenging place. In China, the spirits were thought to travel with the straight lines. The straight lines were avoided, unless ruling otherwise

by an emperor. In Britain, the evidence of the paths of spirits is discovered in old earthen burial heaps. There does appear to be some kind of connection with the supernatural activity and the spirit path, specifically where the structure is constructed crossing one of the paths where experiences of the paranormal activity and apparitions have been reported.

In the year of 1950, the enthusiasts of the UFOs noticed that the sightings of the UFOs were taking place in the straight lines. The UFO enthusiasts and pilots made the connection between existence of the UFO sightings and leys in the year of 1958. In the current era, many reports of the sightings with the vortexes and ley lines in the areas like Hudson River Valley, Sedona, Bermuda Triangle and Stonehenge are not rare and have really become famous as hot spots.

# Wrapping Up

## *The Dos And Don'ts Of Visiting A Spiritual Place*

---

Visiting a spiritual place can have some profoundly positive impacts on the lives of people. Earth is dotted with power and energy centers where people have experienced healings, visions, inspirations, prophecies or insights in the meaning of the lives. Stonehenge in England, pyramids in Egypt, Mount Shasta in California, Machu Picchu in Peru and Sedona in Arizona are amongst the best known and famous energy and spiritual places in the world. However, there are around one thousand holy wells, stone circles, healing springs, sacred forests, pagan temples and oracle caves all around the planet which have been drawing in visitors since the old times.

One of the most powerful and energetic centers in United States of America is Sedona. Sedona became the colony of artists in the year of 1950 when surrealist sculptor and painter Max and the author Kahlil moved in. After the harmonic convergence in the year of 1987 was held in Sedona, this became the center of the new age in the country. The study of 1995 by chamber of commerce discovered that around sixty four percent of the people who visit Sedona every year come to discover some type of spiritual experience. Focal and most important points of power of Sedona are the four energy and power vortexes, recognized in the year of 1980.

Several people who retire in Sedona say it is due to its mild atmosphere and the beautiful and very attractive scenery. It is really not uncommon for the visitors or the travelers of Sedona to fall in love with the place, purchase houses there. After a few months they have to move out due not being able to withstand the constant forces of the energy and power. This place is headquarters for many psychics, massage therapists, spiritual counselors, astrologers and the other workers of energy. Sedona is the only city in a world with around one thousand and five hundred channels and really no station of television.

The people hoping for the transformation experience during travel can increase their chances of the non-ordinary occasion by preparing or getting ready in advance of the visit. Prior to the native youth going on vision quests, she or he would train with the shaman to understand the spirit world. They may participate in extensive prayers, chanting, dancing, drumming, fasting or mushrooms and herbs. You cannot expect to have the same quality experience from Sedona if you just show up at the place such as the Stonehenge.
